UW-500/600

Multi-Pocket Desktop Note Sorters

Value counting, authenticating and sorting

(UW-500 shown)

The UW-500 and UW-600 are equipped with GLORY's next generation sensor technology for suspect note detection. CertainSort™ sophisticated technology automatically detects fitness, denomination and orientation and accurately sorts mixed banknotes for the ultimate in productivity, accuracy, and counterfeit detection. By eliminating the manual sorting process, CertainSort™ features minimize labor and increase profitability.

The UW-500 and UW-600 currency sorters provide four or eight stacker capacity, offering fitness detection and orientation to reduce time due to fewer steps in the counting process.

UW-Series note sorters deliver an efficient, scalable solution while providing reliable performance, all within a compact tabletop design. Applications include bank branches, vaults, retail and casino gaming cash rooms.

Glory Global Solutions is a World Expert in cash management, delivering technology and solutions that provide security, productivity and innovation to our customers. These solutions are supported by the technical expertise of GLORY Group of Japan, the pioneer in development and manufacture of money handling machines across the financial, retail, vending machine, amusement and gaming industries for nearly 100 years.

Across the world, Glory Global Solutions is trusted by thousands of organizations to ensure their cash is managed securely and efficiently while delivering the ultimate in productivity. 2,500 professionals, including over 1,300 service and support staff and 350 business partners cover over 128 countries delivering these solutions – wherever money moves.

Advantage: Glory

Simple to use

Dual LCD displays communicate with the operator by communicating the count data and messages as well as systems status and error recovery graphics.

Fully configurable

The UW-Series, with four or eight note stackers, can be configured according to your needs to face or orient notes, value count, batch and/or off-sort a specific denomination. UW-Series sorters can also be configured to check banknote fitness, allowing for the reuse of only fit currency.

Large Capacity

The input hopper holds 1,000 notes while the output stackers hold up to 500 notes each.

Note Feeder

The UW-Series reliably feeds notes at 720 per minute. The feeding of poorer quality notes is enhanced by our assisted feed mechanism. This mechanism can also be disengaged by the user during operation to allow notes to be continuously stacked and fed into the sorter for non-stop processing..

Feed Path

The note feed path, whether in the counting and bill validation area or the horizontal note transport, is highly accessible. This makes jam recovery simple and fast.

UW-500/600 Technical Information

	UW-500	UW-600
Dimensions *(W x D x H)*	23.6" x 17.5" x 23.6"	47.2" x 17.5" x 23.6"
Weight	176.4 lbs	264.6 lbs
