

AQ2 REMITTANCE

ANY COMPANY THAT ACCEPTS CHECKS AS A FORM OF PAYMENT CAN BENEFIT FROM AQ2 REMITTANCE.

Perhaps you receive remittances in the mail, with or without remittance slips, or you run a retail operation where you collect paper check payments at a front-counter operation. If you receive paper check payments from your customers, especially medium to high volumes, chances are you spend a lot of time processing those payments.

AQ2 Remittance is scalable for businesses that process as few as 25 to 50 checks per day, up to hundreds or even thousands of checks daily.

NO MORE LABORIOUS MANUAL PROCESS

Once your checks are grouped into batches, they undergo a series of labor-intensive steps to get them into a deposit-ready state. You probably make photocopies, hand-key the amounts into your accounting system, encode/endorse each check, prepare a deposit slip, balance the deposit, etc. And once they are deposit-ready, then you still have to drive or have them shipped to the bank for depositing.

What if you could automate this manual process? **AQ2** Remittance makes this possible.

IMPROVE CHECK PROCESSING EFFICIENCY

Using check capture technology, you can significantly reduce operations and labor costs. **AQ2** Remittance allows users to electronically transmit check images and related information quickly, without relying on couriers or daily trips to the nearest branch. Furthermore, the high costs of manually listing check amounts on deposit slips, manual research processes, and hardcopy distribution all become things of the past.

- A full-featured check capture and electronic deposit solution for businesses.
- Scan checks wherever check payments are processed.
- Eliminate photocopies; access check images at any time.
- Capture data for uploading into your accounts receivable system.
- Automatically reject checks from non-customers (closed/canceled accounts).
- Encode/endorse checks through the scanner.
- Eliminate paper check transportation expenses.
- Reduce data entry keystrokes using amount recognition.
- Reduce paper handling and overall number of touchpoints.
- Transmit checks electronically for Check 21 and ACH clearing and posting.
- Supports multiple banks/accounts; specify file type generated (X9.37) for each account.
- Secure remote transmission of sensitive customer check data.
- Access deposited funds faster.
- Enable secure accessibility across the enterprise.
- Deliver better value and service to your customers.
- Run comprehensive transaction-based reports quickly.
- No monthly charges or transaction fees.
