

NEWKON Embosser Model 60

Embossing machines are used to legitimize original documents for Government, Cities, Counties, Universities, and Corporations. These machines create raised (dry) seals which cannot be duplicated.

You can choose from 2 seal sizes: 27mm + 36mm

The New KON model 60 is the most safe, economical and easy-to-use manual embosser on the market today. The extra long handle provides a smooth embossing action, which will lessen the possibility of a carpal tunnel injury. This tabletop unit is both compact and portable. KON embossers prevent possible alterations or forgeries of important documents.

Recommended Applications:

All Vital & Official Documents:

School & University Transcripts and Validations

- Government Seals: Assessor-Clerk-Recorder, Courts
- Vital Statistics: Birth, Death, Marriage & Health Departments
- Notary Public, Engineering & Architecture Firms
